

Q.1. Write a C++ program that demonstrates how to copy elements from one 2D array to another using recursion.

Q.2. C++ program that takes input from the user for a 2D array and then calculates the sum of all the numbers using recursion.

Q.3. Write a C++ program that demonstrates how to delete an element from a one-dimensional array using recursion.

Q.4. Write a program that demonstrates linear search in an array using recursion in C++.
